4 Inch	\$101.28
6 Inch	\$191.44
8 Inch	\$299.59
10 Inch	\$425.82

WASTEWATER CALCULATIONS

History Based Consumption

In order to calculate a wastewater bill, single family residential customers must know their History Based Consumption (HBC). The HBC is the average amount of water that a residential customer uses between November and February. This value will differ between customers. Every March, the HBC will update with the new average consumption.

Calculate HBC

Water Usage {
 November 6,000
 December 3,000
 January 3,000
 February +4,000

Consumption 16,000 ÷ 4 months
 Nov-Feb Average 4,000 gallons

Volume on Bill 4 units*

* If you are a new resident, an HBC of 7 units is assigned for the first year.

Calculate Bill

Volume on Bill 4
 Volume Rate x \$3.71
 Volume Charge \$14.84
 Service Fee + \$20.17

Total Bill \$35.01
